

Evil Pea Cards: Print back to back or stick them back to back.

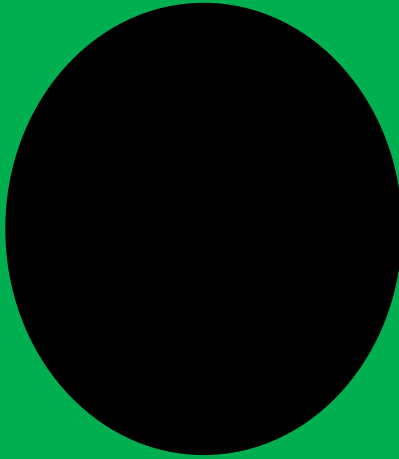

Ask the children to count the spots and match a number card to the spots, then flip over and see if the Evil Pea has put the correct numeral on the other side.... or is the Evil Pea trying to trick us!!

Go to [Mr Mc Making Memories](#) and look in the videos for the special version of the counting video, to use as a starter for your maths lesson! Look out for the Evil Pea who turns up in the middle of the video to cause chaos!
